

Find and fix in 5 minutes.

Did you know that common household leaks can waste up to 10,000 gallons of water a year? During Fix a Leak Week, take five days to complete **five simple steps in five minutes per day** to find and fix leaks around your home.

March 17-23, 2025

Fix a Leak Week

EPA
WaterSense

www.epa.gov/watersense/fix-leak-week

Take **5 minutes** over **5 days** to be leak-free and save water all year long.

1. **Flag down high water use.**

Review your water bill in January; over 12,000 gallons is high for a family of four.

2. **Put your toilet to the test.**

Put some food coloring in the tank; if it leaks into the bowl after five minutes, it's a leak.

3. **Flip your flapper.**

Replace your old, worn-out toilet flapper to stop toilet leaks.

4. **Make the switch to savings.**

Swap out old faucet aerators with WaterSense labeled models.

5. **Look for leaky trouble.**

Check under sinks, tub spouts, and hose bibbs for drips and puddles and tighten joints.
